

ACTUAL_CONTENT_LOADING_SUMMARY

ACTUAL CONTENT LOADING IMPLEMENTED

EXPLANATION CARDS NOW SHOW ACTUAL CONTENT

I've successfully updated the system to load and display the **actual content** from all explanation markdown files in the tabbed interface:

FILES UPDATED:

mental_health_app_fixed.py:

- **Enhanced** `load_explanation_cards()` **function** to load actual content from markdown files
- **Added colorama feedback** for loading status:
 - Green: Successfully loaded explanation cards
 - Yellow: File not found warnings
 - Red: Error loading messages
- **Proper error handling** with graceful fallback content
- **Actual content loading** from:
 - `7_MODEL_EXPLANATION_GUIDE.md`
 - `8_RISK_CLASSIFICATION_REFERENCE_CARD.md`
 - `9_TREATMENT_SEEKING_GUIDE.md`
 - `10_SYMPTOM_SCORE_INTERPRETATION.md`
 - `11_MODEL_TECHNICAL_SPECIFICATIONS.md`

TABBED INTERFACE FEATURES:

"Model Explanation Guide" Tab:

- Shows complete content from `7_MODEL_EXPLANATION_GUIDE.md`
- Contains detailed explanations for all 4 prediction goals
- Includes real-world application examples

"Risk Classification Reference" Tab:

- Shows complete content from `8_RISK_CLASSIFICATION_REFERENCE_CARD.md`
- Contains comprehensive risk level definitions
- Includes detailed criteria and profiles for each risk level

"Treatment Seeking Guide" Tab:

- Shows complete content from `9_TREATMENT_SEEKING_GUIDE.md`
- Contains detailed treatment recommendation guidelines
- Includes personalized intervention strategies

"Symptom Score Interpretation" Tab:

- Shows complete content from `10_SYMPTOM_SCORE_INTERPRETATION.md`
- Contains detailed depression and anxiety score explanations
- Includes score range meanings and interpretation guides

"Model Technical Specifications" Tab:

- Shows complete content from `11_MODEL_TECHNICAL_SPECIFICATIONS.md`
- Contains detailed performance metrics and validation evidence
- Includes algorithm specifications and accuracy measurements

ENHANCED USER EXPERIENCE:

- **Full content visibility:** All explanation details now visible in respective tabs
- **Proper markdown rendering:** All formatting, tables, and code blocks preserved
- **Real documentation:** Actual professional documentation instead of placeholder text
- **Comprehensive information:** Complete explanation materials as intended
- **Error resilience:** Graceful handling when files are missing

CONTENT LOADING FEEDBACK:

- **Successful loads:**  "Loaded explanation card X: filename"
- **Missing files:**  "Could not load explanation card X: filename"
- **Errors:**  "Error loading card X: error message"
- **System logs:** All loading activities logged for debugging

The system now provides **complete, actual content** in each explanation tab, making it a fully functional mental health prediction system with comprehensive documentation! 💬 ✨
