

CLEAN_REPO_SUMMARY

Repository Cleanup - Completed

Files Moved to old_dev Directory

The following files have been moved to the `old_dev/` directory to keep the main repository clean:

- `gradio_interface_final.py` - Old Gradio interface implementation
- `mental_health_predictor.py` - Initial predictor implementation
- `mental_health_predictor_updated.py` - Updated predictor version
- `mental_health_ml_system_corrected.py` - Corrected ML system (backup)
- `ACTUAL_CONTENT_LOADING_SUMMARY.md` - Content loading implementation notes
- `CLEAN_IMPLEMENTATION_SUMMARY.md` - Clean implementation notes
- `COLORAMA_ENHANCEMENTS_SUMMARY.md` - Colorama enhancement notes
- `UPDATES_SUMMARY.md` - Update summary notes
- `SYSTEM_SUMMARY.md` - System summary notes
- `FIXED_SYSTEM_SUMMARY.md` - Fixed system notes
- `FINAL_IMPROVEMENTS_SUMMARY.md` - Final improvements notes

Current Main Directory Contents

The main directory now contains only the essential files:

Core Application:

- `mental_health_ml_system.py` - Main ML application with Decision Tree Classifier

Documentation:

- `PROJECT_REPORT.md` - Comprehensive project documentation
- `README.md` - Project overview and usage instructions
- `MODEL_CHOICE_RATIONALE.md` - ML engineer's rationale for model selection
- `FINAL_IMPLEMENTATION_SUMMARY.md` - Summary of completed implementation

Configuration:

- `requirements.txt` - Project dependencies
