

COMPLETE_ANALYSIS_PLAN

COMPLETE MENTAL HEALTH DATASETS CLUSTERING & ANALYSIS PLAN

Healthcare Data Analytics Internship - ALL 58 Datasets

COMPLETE DATASET INVENTORY (58 FILES)

CLUSTER 1: CORE GLOBAL PREVALENCE DATA (12 datasets)

1. 1- mental-illnesses-prevalence.csv
2. mental-illnesses-prevalence.csv
3. mental-illness-estimated-cases.csv
4. anxiety-disorders-prevalence.csv
5. depressive-disorders-prevalence-ihme.csv
6. bipolar-disorder-prevalence.csv
7. schizophrenia-prevalence.csv
8. eating-disorders-prevalence.csv
9. anxiety-disorders-prevalence-by-age.csv
10. depressive-disorders-prevalence-by-age.csv
11. bipolar-disorder-prevalence-by-age.csv
12. schizophrenia-prevalence-by-age.csv

CLUSTER 2: BURDEN OF DISEASE & MORTALITY (6 datasets)

13. 2- burden-disease-from-each-mental-illness(1).csv
14. death-rates-from-mental-and-substance-disorders-by-age-who.csv
15. estimated-prevalence-vs-burden-mental-illnesses.csv
16. depressive-disorders-prevalence-ihme-vs-who.csv
17. anxiety-disorders-prevalence-vs-gdp.csv
18. depressive-disorders-prevalence-vs-gdp-per-capita.csv

CLUSTER 3: DEMOGRAPHIC & GENDER BREAKDOWN (12 datasets)

19. anxiety-disorders-prevalence-males-vs-females.csv
20. depressive-disorders-prevalence-males-vs-females.csv
21. bipolar-disorder-prevalence-males-vs-females.csv
22. schizophrenia-prevalence-males-vs-females.csv
23. eating-disorders-prevalence-males-vs-females.csv
24. discomfort-speaking-anxiety-depression-by-gender.csv
25. experienced-calmness-a-lot-of-the-day-yesterday-by-gender.csv
26. men-women-friends-family-anxious-depressed.csv
27. age-when-first-had-anxiety-depression.csv
28. eating-disorders-prevalence-by-age.csv
29. experienced-calmness-a-lot-of-the-day-yesterday-by-age.csv
30. share-who-report-lifetime-anxiety-or-depression.csv

CLUSTER 4: TREATMENT GAP & HEALTHCARE ACCESS (12 datasets)

31. 5- anxiety-disorders-treatment-gap.csv
32. anxiety-disorders-treatment-gap.csv
33. 3- adult-population-covered-in-primary-data-on-the-prevalence-of-major-depression.csv
34. 4- adult-population-covered-in-primary-data-on-the-prevalence-of-mental-illnesses.csv
35. 7- number-of-countries-with-primary-data-on-prevalence-of-mental-illnesses-in-the-global-burden-of-disease-study.csv
36. number-of-countries-with-primary-data-on-prevalence-of-mental-illnesses-in-the-global-burden-of-disease-study.csv
37. psychiatrists-working-in-the-mental-health-sector.csv
38. mental-health-units-in-general-hospitals.csv
39. stand-alone-policy-or-plan-for-mental-health.csv
40. dealt-with-anxiety-depression-took-prescribed-medication.csv
41. dealing-with-anxiety-depression-approaches.csv
42. dealing-with-anxiety-depression-comparison.csv

CLUSTER 5: SOCIAL ATTITUDES & BEHAVIORAL FACTORS (10 datasets)

43. dealt-with-anxiety-depression-friends-family.csv
44. dealt-with-anxiety-depression-religious-spiritual.csv
45. friends-family-anxious-depressed.csv
46. comfort-speaking-vs-knowing-friends-family-with-anxiety-depression.csv
47. perceived-comfort-speaking-anxiety-depression.csv

- 48. perceived-comfort-speaking-anxiety-depression-vs-talked-to-family-friends-when-had-anxiety-depression.csv
- 49. discomfort-speaking-anxiety-depression.csv
- 50. importance-government-funding-research-anxiety-depression.csv
- 51. importance-science-treating-anxiety-depression.csv
- 52. share-who-say-its-extremely-important-for-the-national-government-to-fund-research-on-anxietydepression.csv

CLUSTER 6: ECONOMIC & POLICY CORRELATES (4 datasets)

- 53. extremely-important-fund-research-anxiety-depression-vs-gdp-per-capita.csv
- 54. science-helps-a-lot-treating-anxiety-depression-vs-gdp-per-capita.csv
- 55. anorexia-bulimia-nervosa-estimated-cases.csv
- 56. depressive-symptoms-across-us-population.csv

CLUSTER 7: INDIVIDUAL-LEVEL CLINICAL DATA (2 datasets)

- 57. mental_health_dataset.csv
- 58. 6- depressive-symptoms-across-us-population.csv

ANALYSIS APPROACH

PHASE 1: SYSTEMATIC EXPLORATION (Today)

- Create individual analysis for each of the 58 datasets
- Document file structure, key variables, and data quality
- Identify patterns and connections between datasets

PHASE 2: CLUSTER-BASED DEEP DIVES (Next Days)

- Comprehensive analysis of each cluster theme
- Cross-dataset correlation analysis
- Integrated insights development

PHASE 3: SYNTHESIS & RECOMMENDATIONS (Final Phase)

- Master integration report

- Actionable insights for internship deliverables
- Future research directions

DELIVERABLES PLANNED

1. **Individual Dataset Analyses** (58 files) - Detailed technical documentation
2. **Cluster Theme Reports** (7 clusters) - Integrated thematic analysis
3. **Master Synthesis Report** - Comprehensive findings and recommendations
4. **Quick Reference Guide** - Navigation and prioritization framework
5. **Technical Appendix** - Data schemas, quality assessments, methodology notes

TIMELINE ESTIMATE

- **Phase 1:** 3-4 hours (58 individual analyses)
- **Phase 2:** 2-3 hours (7 cluster integrations)
- **Phase 3:** 1-2 hours (master synthesis)
- **Total:** 6-9 hours comprehensive analysis

"Every dataset tells a story. Together, they reveal the complete picture of global mental health."

UPDATE: Analysis in progress - systematically examining ALL 58 datasets cluster by cluster.

STATUS UPDATE: Comprehensive analysis in progress - ALL 58 datasets targeted

COMPLETED SO FAR:

- ☒ Cluster 1: Core Global Prevalence (12/12 datasets) - FULLY ANALYZED
- ☒ Cluster 2: Burden of Disease & Mortality (6/6 datasets) - COMPLETE
- ☒ Cluster 3: Demographic & Gender Breakdown (5/12 datasets) - IN PROGRESS
- ☒ Cluster 4: Treatment Gap & Healthcare Access (6/12 datasets) - IN PROGRESS
- ☒ Cluster 5: Social Attitudes & Behavioral Factors (5/10 datasets) - IN PROGRESS
- ☐ Cluster 6: Economic & Policy Correlates (2/4 datasets) - STARTED
- ☐ Cluster 7: Individual-Level Clinical Data (1/2 datasets) - IN PROGRESS

PROGRESS TRACKING:

- **Documents Created:** 25 comprehensive dataset analyses

- **Datasets Analyzed:** 32/58 (55% complete)
- **Clusters Completed:** 2/7 clusters substantially progressed
- **Remaining Work:** 26 datasets across 5 clusters

ACCELERATED COMPLETION STRATEGY:

- **High-priority focus** on largest remaining datasets
- **Batch processing** of similar dataset types
- **Parallel analysis** of interconnected datasets
- **Systematic completion** of remaining clusters

COMMITMENT: Continuing intensive work until ALL 58 datasets are fully analyzed and documented
