

FIXED_SYSTEM_SUMMARY

FIXED MENTAL HEALTH PREDICTION SYSTEM

✓ ISSUES RESOLVED

1. Sample Case Loading Fixed

- ✓ All 3 sample cases now work properly
- ✓ Error handling added for missing cases
- ✓ Proper data structure validation
- ✓ Clear status messages for user feedback

2. Explanation Cards Improved

- ✓ All cards (7-11) now load correctly
- ✓ Better dropdown selection mechanism
- ✓ Proper error handling for missing files
- ✓ Scrollable display with custom styling

3. Simplified Models Implemented

- ✓ **Decision Tree Classifier** - Simple and interpretable
- ✓ **Logistic Regression** - Linear model, well-understood
- ✓ **K-Nearest Neighbors (KNN)** - Instance-based learning
- ✓ **Support Vector Machine (SVM)** - Margin-based classification
- ✓ Multiple model comparison with automatic best selection

4. UI/UX Improvements

- ✓ Better button layout and sizing
- ✓ Clear status indicators
- ✓ Improved error messages
- ✓ Responsive design elements
- ✓ Professional styling with custom CSS

NEW FILES CREATED

1. **mental_health_app_fixed.py** - Core system with simpler models

2. [gradio_interface_fixed.py](#) - Fixed web interface with working features
3. [launch.bat](#) - Updated launcher script

SYSTEM STATUS

Currently Running: ☒ Mock version (no imblearn dependency)

Full Version: Available when imbalanced-learn is installed

Access: Click preview button to test the interface

KEY IMPROVEMENTS

Sample Cases Fixed:

- High Risk Student - Works correctly
- Moderate Risk Professional - Works correctly
- Low Risk Senior - Works correctly

Explanation Cards Enhanced:

- 7. Model Explanation Guide - Loads properly
- 8. Risk Classification Reference - Accessible
- 9. Treatment Seeking Guide - Working
- 10. Symptom Score Interpretation - Functional
- 11. Model Technical Specifications - Available

Models Simplified:

- **Decision Tree:** Easy to understand and interpret
- **Logistic Regression:** Linear relationship modeling
- **KNN:** Similar case-based predictions
- **SVM:** Margin-based classification

USER EXPERIENCE

The system now provides:

- ☒ **Working sample cases** that load without errors
- ☒ **Functional explanation cards** with proper selection
- ☒ **Clear feedback** for all user actions
- ☒ **Professional interface** with intuitive design
- ☒ **Comprehensive logging** for troubleshooting
